Our services explained

3hr Drinks Packages

Your Event

Step 1

Booking

Get an idea of how many people you think will be attending, (only people you want to have access to the bar are relevant here!)

Choose an appropriate drinks package & browse our *menus for inspo! We will advise you on staff and bar choices based on numbers and set up locations.

Send us the finer details like the nature of the event, the date, the address and the times youd like the bar to be open.

Once all of the details are agreed, We will produce an event summary for you to review.

Agree to our terms, pay your deposit through a secure payment link & revel in the fact that your EVENT IS BOOKED!!!!

Step 2

The event

We will have organised a time suitable to come and set up your mobile bar in advance. We usually need around 2 hrs to set up.

Our bartenders & events staff will arrive an hour before servce starts to prepare garnishes, and get ready for their shifts.

Once service starts, the bar will operate like normal. Head over, and whatever you order, will be made by our top bartenders & mixologists. Until either the time or the tokens runs out.

During the event, staff will keep the glassware situation under control and we will endeavour to keep drinks flowing. We take dirties away and wash them off site.

Step 3

Breakdown

Our team clean up as much as they can, immediately after the event & in most cases, most of the glassware and stock is removed on the night. Usually takes about an hour.

We will come and collect the bar structure, which could be on the night, but may need to be the day after or even the following Monday if the event falls on a weekend - We are flexible!

We will remove all waste produced by the bar.

If you're ok with it, we may post some of our images / footage on social media to showcase what we do!

And finally, if you LOVED our bar service and the whole experience - Why not leave us a 5* review!

Menu choices are up to you, but regarding cocktails, we advise no more than 5 to appear on the event menu. We can't transport much more stock than that from place to place & assure the quality we want to offer.
